Description

Cloud Architect in TCS

This is an exciting opportunity for a skilled cloud architect to contribute to cutting-edge projects and collaborate with industry leaders. You'll work closely with clients to understand their requirements, design secure and scalable cloud architectures, and oversee the implementation process. Your expertise will ensure clients can optimize their IT infrastructure, achieve business goals, and gain a competitive edge in the cloud era.

TCS Jobs near me

Responsibilities:

Design, develop, and implement secure, scalable, and cost-effective cloud solutions on platforms like AWS, Azure, GCP, or other relevant cloud providers (based on specific role).
Collaborate with clients to understand their business needs, cloud adoption goals, and infrastructure requirements.
Translate business needs into technical cloud architectures, considering factors like scalability, security, performance, and cost.
Select appropriate cloud services, design infrastructure components, and ensure secure integration with on-premise systems (if applicable).
Oversee the implementation process, working with developers, DevOps engineers, and security professionals.
Monitor and optimize cloud deployments, ensuring performance, scalability, and adherence to best practices.
Stay up-to-date on the latest cloud technologies, advancements,

and security protocols.
Provide technical expertise and guidance to other team members and stakeholders involved in cloud projects.
