Infosys Careers

About Infosys

Infosys is a global leader in next-generation digital services and consulting, empowering clients in 45 countries to navigate their digital transformation journeys. With over three decades of experience, Infosys is an expert in guiding businesses through every stage of their digital evolution. This is achieved through an AI-powered core that prioritizes efficient change execution, and agile digital solutions delivered at scale. Infosys fosters a continuous learning environment, driving employee growth through knowledge sharing and innovation.

Why Join Infosys as a DevOps Engineer?

In this exciting role, you'll be at the forefront of innovation, leveraging cutting-edge technology to build and automate a highly efficient, flexible, and fault-tolerant IT infrastructure. You'll collaborate closely with developers, operations teams, and other stakeholders to bridge the gap between development and operations, ensuring a seamless software delivery pipeline. As a remote DevOps Engineer at Infosys, you'll enjoy the flexibility of working from anywhere while contributing to impactful projects for a global clientele.

Job Summary

We are seeking a passionate and skilled DevOps Engineer to join our growing team. In this role, you'll be responsible for designing, developing, implementing, and maintaining DevOps tools and processes that automate the software delivery lifecycle. You'll play a key role in streamlining our CI/CD pipeline, ensuring faster and more reliable software deployments.

Here's a closer look at what you'll be doing:

- **Design and implement DevOps tools and processes:** You'll leverage your expertise in configuration management, infrastructure automation, and continuous integration/continuous delivery (CI/CD) to build a robust DevOps toolchain.
- **Automate the software delivery pipeline:** You'll be responsible for automating various stages of the software delivery lifecycle, including code building, testing, deployment, and monitoring.
- **Collaborate with development and operations teams:** You'll work closely with developers and operations teams to bridge the gap between development and operations, fostering a collaborative DevOps culture.
- **Identify and implement performance improvements:** You'll continuously monitor and analyze the DevOps pipeline, identifying areas for improvement and implementing solutions to enhance efficiency and performance.
- **Maintain and troubleshoot DevOps tools:** You'll be responsible for maintaining the DevOps toolchain, performing regular checks, and troubleshooting any issues that may arise.
- **Stay up-to-date with the latest DevOps technologies:** You'll have the opportunity to learn and experiment with the latest DevOps tools and technologies, keeping Infosys at the forefront of innovation.

Key Responsibilities

- Design, develop, and implement DevOps tools and scripts for automation.
- Configure and manage infrastructure as code (IaC) tools like Terraform or Ansible.
- Implement and manage CI/CD pipelines using tools like Jenkins, GitLab CI/CD, or CircleCI.
- Manage containerization technologies like Docker and Kubernetes.
- Configure and manage cloud platforms like AWS, Azure, or GCP (experience with a specific platform is a plus).
- Monitor and troubleshoot DevOps pipelines.
- Collaborate with development, operations, and security teams.
- Stay up-to-date with the latest DevOps trends and technologies.

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- 2+ years of experience as a DevOps Engineer or a related role.
- Strong understanding of DevOps principles and methodologies.
- Experience with configuration management tools like Ansible or Chef.
- Experience with CI/CD tools like Jenkins, GitLab CI/CD, or CircleCI.
- Experience with containerization technologies like Docker.
- Working knowledge of scripting languages like Python, Bash, or

PowerShell.

- Experience with cloud platforms (AWS, Azure, or GCP) is a plus.
- Excellent problem-solving and analytical skills.
- Strong communication and collaboration skills.
- Ability to work independently and as part of a team.

Experience Level: This role is open to both experienced DevOps Engineers (2+ years) and passionate individuals with a strong foundation in DevOps principles and a willingness to learn.
