Description

Job Title: Data Analyst

Job Summary:

The Data Analyst will be responsible for collecting, organizing, and analyzing large data sets to identify trends, patterns, and insights that inform business decisions.

(adsbygoogle = window.adsbygoogle || []).push({});

Key Responsibilities:

Data Analysis

- Collect and process large data sets from various sources, including databases, spreadsheets, and external data providers
- Develop and maintain databases and data systems to store and manage data
- Design and implement data models, reports, and dashboards to meet business requirements

Data Visualization

- Create interactive and dynamic reports, dashboards, and visualizations to communicate insights to stakeholders
- Develop and maintain data visualization tools, such as Tableau, Power BI,

or D3.js
