### Description

## Job Title: Data Recovery Specialist

### Job Summary:

Infosys is seeking a highly skilled Data Recovery Specialist to join our team. The successful candidate will be responsible for recovering data from damaged, corrupted, or inaccessible storage media, including hard drives, solid-state drives, and other digital devices.

(adsbygoogle = window.adsbygoogle || []).push({});

### Key Responsibilities:

#### Data Recovery Operations

- Recover data from various types of storage media, including hard drives, solid-state drives, and other digital devices
- Utilize specialized software and hardware tools to recover data from damaged or corrupted storage media
- Perform thorough analysis of storage media to identify potential data recovery opportunities
- Develop and implement customized data recovery strategies to maximize data retrieval

#### Data Analysis and Reporting

- **Analyze recovered data to identify relevant information and provide detailed reports to clients**
- Utilize data analysis tools and techniques to extract relevant information from recovered data
- Prepare comprehensive reports detailing data recovery efforts, including successes and challenges

### **Quality Control and Assurance**

- **Ensure the quality and integrity of recovered data, adhering to industry standards and best practices**
- Conduct quality control checks to verify the accuracy and completeness of recovered data
- Implement quality assurance processes to maintain the highest level of data recovery standards

### **Collaboration and Communication**

- **Collaborate with cross-functional teams, including sales, marketing, and customer service, to ensure seamless data recovery operations**
- Communicate effectively with clients, providing regular updates on data recovery progress and results
- Develop and maintain strong relationships with clients, ensuring high levels of customer satisfaction

### **Requirements:**

#### **Education and Experience**

- **Bachelor's degree in Computer Science, Information Technology, or a related field**
- Minimum 2 years of experience in data recovery, with a strong understanding of data storage technologies and file systems
- Proven track record of successful data recovery projects, with a focus on quality and customer satisfaction

#### **Skills and Knowledge**

- **In-depth knowledge of data recovery software and hardware tools,**

**including EnCase, FTK, and X-Ways Forensics**

- Strong understanding of file systems, including NTFS, HFS+, and FAT
- Excellent analytical and problem-solving skills, with the ability to work independently and as part of a team
- Strong communication and interpersonal skills, with the ability to effectively communicate with clients and stakeholders

**What We Offer:**

- **Competitive salary and benefits package**
- Opportunities for professional growth and development in a dynamic and innovative company
- Collaborative and dynamic work environment, with a team of experienced data recovery professionals
