Description

Tata Motors Recruitment 2024

About Tata Motors

Tata Motors, a global automobile manufacturer, is a pioneer in India's automotive industry. From iconic vehicles like the Indica and Nano to the cutting-edge electric cars of today, Tata Motors has been at the forefront of automotive innovation for over 75 years. With a strong commitment to sustainability and a vision for a future of clean mobility, Tata Motors is shaping the transportation landscape of tomorrow.

Why Join Us as an Information Security Analyst?

In this dynamic role, you'll play a vital part in safeguarding Tata Motors' critical infrastructure and data. You'll be at the forefront of our cybersecurity team, working alongside industry experts to identify, analyze, and mitigate potential threats. This is a unique opportunity to contribute to the security of a global automotive leader while honing your skills in a fast-paced and rewarding environment.

Position: Information Security Analyst (Remote)

Company: Tata Motors

Location: Remote (Open to applicants from all locations)

(adsbygoogle = window.adsbygoogle || []).push({});

Job Summary:

As an Information Security Analyst, you'll be responsible for a wide range of tasks, including:

- Identifying and analyzing security vulnerabilities in systems and applications.
- Monitoring security events and incidents, investigating potential breaches, and implementing appropriate response measures.
- Assisting in the development, implementation, and maintenance of information security policies and procedures.
- Staying up-to-date on the latest cyber threats and trends, and recommending proactive security measures.
- Working collaboratively with other security professionals and IT teams to ensure a comprehensive and robust security posture.
- Performing security awareness training for employees.

Key Responsibilities:

- Conduct vulnerability assessments and penetration testing to identify weaknesses in systems and applications.
- Analyze security logs and event data to detect suspicious activity and potential breaches.
- Investigate security incidents, determine root cause, and recommend remediation actions.
- Participate in incident response planning and execution activities.
- Develop and maintain security documentation, including threat models, incident response plans, and security policies.
- Stay informed about emerging cyber threats and vulnerabilities, and recommend appropriate security controls.
- Collaborate with IT teams to implement security solutions and configurations.
- Conduct security awareness training programs for employees to educate them on cybersecurity best practices.

Required Skills and Qualifications:

- Bachelor's degree in Computer Science, Information Security, or a related field (or equivalent experience).
- Minimum 1-2 years of experience in information security analysis.
- Strong understanding of security principles, concepts, methodologies, and best practices (including NIST Cybersecurity Framework).
- Experience with security tools and technologies (e.g., vulnerability scanners, SIEM/SOC tools, intrusion detection/prevention systems).
- Excellent analytical and problem-solving skills.
- Strong communication and collaboration skills.
- Ability to prioritize tasks and work independently in a fast-paced environment.

Experience:

This role is open to both experienced security analysts and enthusiastic individuals with a strong foundation in information security.

- **For experienced professionals:** We are looking for candidates with a proven track record of success in information security analysis. Your experience should include vulnerability assessments, incident response, security policy development, and security awareness training.
- **For freshers:** If you have a strong academic background in information

security and a passion for cybersecurity, we encourage you to apply. We offer a supportive and collaborative environment where you can learn from experienced professionals and develop your skills.
