### Employment Type

Full-time, Work From Home

### Description

## Job Title: Software Engineer

### Job Summary:

The Software Engineer will be responsible for designing, developing, testing, and maintaining software applications to meet business requirements. This role involves collaborating with cross-functional teams to identify and prioritize project requirements, developing high-quality software solutions, and ensuring timely delivery of projects.

(adsbygoogle = window.adsbygoogle || []).push({});

### Key Responsibilities:

#### Design and Development

Design, develop, test, and maintain software applications using various programming languages and technologies. Collaborate with team members to identify and prioritize project requirements. Develop high-quality software solutions that meet business requirements and industry standards.

#### Testing and Quality Assurance

### Hiring organization

Tata Consultancy Services

### Date posted

September 17, 2024

### Valid through

31.12.2024

APPLY NOW

Develop and execute unit tests, integration tests, and other types of tests to ensure software quality. Identify and troubleshoot software defects and implement fixes. Collaborate with QA teams to ensure software meets quality standards.

## Collaboration and Communication

Collaborate with cross-functional teams, including project managers, designers, and quality assurance engineers. Communicate technical information to non-technical stakeholders. Participate in code reviews and provide constructive feedback to team members.
